### ***@ Job Profile***

My present and previous Job Responsibilities include Coordination, Planning and execution of the Educational projects, Medical, Commercial Buildings and Residential Buildings etc.,

I am specialized in engineering and designing of bulk material handling plants and its machinery like Testing, I.Q.C, Site Planning, Site Execution, and Billing.

- Acts as prime point of contact with the client for the construction, supervision aspects of the project, including progress reporting, safety, financial recommendations, quality control and design modification.
- Preparing the project schedule updating the status of project planning.
- Follow up with the EPC contractor construction planning and progress on daily basis.
- Liaison with Client, Contractor and Local Authority (where appropriate to the project) for compliance with local construction regulations.
- Ensures that the Construction Supervision teams members effectively identify, manage and report project risks.
- Preparing technical data sheets of project & estimation and quoting the tenders.
- Preparation of extra items and Checking of Bills.
- Uses effective project management and controls systems to regularly report on progress to the General Manager.
